

# SIX Contrarian 15 Index

Gives access to underperformed stocks.

The SIX Contrarian 15 is based on the companies listed at the Stockholm Stock Exchange that exhibits the most negative price momentum.

The SIX Contrarian 15 Index is owned and calculated by SIX Financial Information. The SIX Contrarian 15 Index is repopulated quarterly and includes the shares with the most negative price momentum among the most liquid shares traded at the Stockholm Stock Exchange. The index has consistently underperformed the market long-term. The index outperforms market indices significantly during a period of time after the market turns from a longer bear market in to bull market.

## SIX Contrarian 15 Index

## Selection process

The index is rebalanced quarterly and is based on the 80 most liquid shares traded on the Stockholm Stock Exchange. The shares are ranked according to their total return (based 50% on the last 3 months and 50% on the last 12 months). The bottom 15 shares are included in the index during the next quarter.

Both the population and the selection process makes SIX Contrarian 15 an index with high investability and easy to replicate.

## Use of Index

The selection process guarantees a high liquidity in the included shares, and makes the index suitable for different types of derivatives and structured products (such as warrants, exchange traded funds, etc.).
